Bulk Update Geo Location	4

Bulk Update Geo Location

The Bulk Update Geo Location tile displays a list of all assets within the application that currently have no geo-location data. Users can efficiently update geo-locations for multiple assets simultaneously. This can be done by selecting assets individually or choosing all at once using the provided checkboxes.

The tile to bulk update the geo-location data can be found in the **Administration** workspace.

Important: After clicking the Update button, please allow the application time to process these changes. It's crucial to avoid multiple clicks on the button during this process to ensure smooth and accurate geo-location updates.

Bulk Update Geo Location
 List of assets are displayed below which do not have a geo-location.

It may take a while to update the Geo location of all the assets. Please do not refresh the page and wait for the bulk update operation to complete. While the operation is in process, you can work on the other areas of the application.

Select All Assets	Asset Name	Asset Reference #	Address Line1	Address Line2	City	Country	Zip code	State
